¹ Index history is for illustrative purposes only and does not represent actual PowerShares DB Gold ETN performance. The inception date of the Deutsche Bank Liquid Commodity Index - Optimum Yield Gold™ is May 24, 2006. Index history is based on a combination of the monthly returns from the Deutsche Bank Liquid Commodity Index – Optimum Yield Gold Excess Return™ (the "Gold Index") plus the monthly returns from the DB 3-Month T-Bill Index (the "T-Bill Index"), resetting monthly as per the formula applied to the PowerShares DB Gold ETNs, less the investor fee. The Gold Index is intended to reflect changes in the market value of certain gold futures contracts and is comprised of a single unfunded gold futures contract. The T-Bill Index is intended to approximate the returns from investing in 3-month United States Treasury bills on a rolling basis.

Index history does not reflect any transaction costs or expenses. Indexes are unmanaged, and you cannot invest directly in an index. **PAST PERFORMANCE DOES NOT GUARANTEE FUTURE RESULTS.** For current index and PowerShares DB Gold ETN performance, go to dbfunds.db.com/notes.

What are the PowerShares DB Gold ETNs?

The PowerShares DB Gold ETNs are senior unsecured obligations issued by Deutsche Bank AG, London Branch that are linked to a total return version of the Deutsche Bank Liquid Commodity Index – Optimum Yield Gold™. The Index is designed to reflect the performance of certain gold futures contracts.

Investors can buy and sell the PowerShares DB Gold ETNs at market price on the NYSE Arca exchange or receive a cash payment at the scheduled maturity or early redemption based on the performance of the index less investor fees. Investors may redeem the PowerShares DB Gold ETNs in blocks of no less than 200,000 securities and integral multiples of 50,000 securities thereafter, subject to the procedures described in the pricing supplement, which may include a fee of up to \$0.03 per security.

Benefits & Risks of PowerShares DB Gold ETNs

ETNs are some of the more benefit-rich investment vehicles available in the marketplace today.

Benefits

- Leveraged and short notes
- Relatively low cost
- Intraday access
- Listed
- Transparent
- Tax treatment³

Risks

- Non-principal protected
- Leveraged losses
- Subject to an investor fee
- Limitations on repurchase
- Concentrated exposure
- Credit risk of the issuer

² The S&P 500® Index is an unmanaged index used as a measurement of change in stock market conditions based on the performance of a specified group of common stocks. The Barclays Capital U.S. Aggregate Bond Index™ is an unmanaged index considered representative of the U.S. investment-grade, fixed-rate bond market. Correlation indicates the degree to which two investments have historically moved in the same direction and magnitude. Volatility is the annualized standard deviation of monthly index returns.

Please be advised that any discussion of U.S. tax matters contained herein (including attachments) (i) is not intended or written to be used, and cannot be used, by you for the purpose of avoiding U.S. tax-related penalties and (ii) was written to support the promotion or marketing of the transactions or matters addressed herein. Accordingly, you should seek advice based on your particular circumstances from an independent tax advisor.

Long, Short, and Leveraged exposure to commodities has never been easier.SM

Deutsche Bank AG, London Branch has filed a registration statement (including a prospectus) with the SEC for the offering to which this communication relates. Before you invest, you should read the prospectus and other documents filed by Deutsche Bank AG, London Branch for more complete information about the issuer and this offering. You may get these documents for free by visiting powersharetns.com | dbfunds.db.com/notes or EDGAR on the SEC website at www.sec.gov. Alternatively, you may request a prospectus by calling 800.983.0903 | 877.369.4617, or you may request a copy from any dealer participating in this offering.

The PowerShares DB Gold ETNs are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk and the consequences of seeking monthly leveraged investment results, and who intend to actively monitor and manage their investments. Investing in the ETNs is not equivalent to a direct investment in the index or index components because the current principal amount (the amount you invested) is reset each month, resulting in the compounding of monthly returns. The principal amount is also subject to the investor fee, which can adversely affect returns. The amount you receive at maturity (or upon an earlier repurchase) will be contingent upon each monthly performance of the index during the term of the securities. There is no guarantee that you will receive at maturity, or upon an earlier repurchase, your initial investment back or any return on that investment. Significant adverse monthly performances for your securities may not be offset by any beneficial monthly performances.

The PowerShares DB Gold ETNs are senior unsecured obligations of Deutsche Bank AG, London Branch, and the amount due on the PowerShares DB Gold ETNs is dependent on Deutsche Bank AG, London Branch's ability to pay. The PowerShares DB Gold ETNs are riskier than ordinary unsecured debt securities and have no principal protection. Risks of investing in the PowerShares DB Gold ETNs include limited portfolio diversification, uncertain principal repayment, trade price fluctuations, illiquidity and leveraged losses. Investing in the PowerShares DB Gold ETNs is not equivalent to a direct investment in the index or index components. The investor fee will reduce the amount of your return at maturity or upon redemption of your PowerShares DB Gold ETNs even if the value of the relevant index has increased. If at any time the redemption value of the PowerShares DB Gold ETNs is zero, your investment will expire worthless.

The PowerShares DB Gold ETNs may be sold throughout the day on NYSE Arca through any brokerage account. There are restrictions on the minimum number of PowerShares DB Gold ETNs that you may redeem directly with Deutsche Bank AG, London Branch, as specified in the applicable pricing supplement. Ordinary brokerage commissions apply, and there are tax consequences in the event of sale, redemption or maturity of the PowerShares DB Gold ETNs. Sales in the secondary market may result in losses.

The PowerShares DB Gold ETNs are concentrated in gold. The market value of the PowerShares DB Gold ETNs may be influenced by many unpredictable factors, including, among other things, volatile gold

prices, changes in supply and demand relationships, changes in interest rates, and monetary and other governmental actions. The PowerShares DB Gold ETNs are concentrated in a single commodity sector, are speculative and generally will exhibit higher volatility than commodity products linked to more than one commodity sector.

The PowerShares DB Gold Double Long ETN and PowerShares DB Gold Double Short ETN are both leveraged investments. As such, they are likely to be more volatile than an unleveraged investment. There is also a greater risk of loss of principal associated with a leveraged investment than with an unleveraged investment.

PowerShares® is a registered trademark of Invesco PowerShares Capital Management LLC. Invesco PowerShares Capital Management LLC is an indirect, wholly owned subsidiary of Invesco Ltd.

An investor should consider the PowerShares DB Gold ETNs' investment objectives, risks, charges and expenses carefully before investing.

An investment in the PowerShares DB Gold ETNs involves risks, including possible loss of principal. For a description of the main risks, see "Risk Factors" in the applicable pricing supplement.
